PRIMARY SCHOOL

Friday 27th March 2026
WHAT AN AMAZING WEEK!

We started with a fantastic performance by our Year 4 class at the Parr Hall on Monday evening. The children wowed with their dance based on our school value of teamwork. Our Reception class had a wonderful day during their visit to Smithill farm, with many falling asleep on the way back to school after an action packed day. Our week ended with our first careers' day, which the children loved. Thank you to all our brilliant parent volunteers, who gave up their time to talk to the children about all the possible careers that are open to them in the future!

Have a lovely weekend!

Miss Fazackerley, Headteacher

MENINGITIS + SEPTICAEMIA

Meningitis is a serious condition where the protective layers around the brain and spinal cord become inflamed. Septicaemia is when the bacteria enter the bloodstream to cause blood poisoning. They can happen to anyone, so it's important to know the symptoms and risks.

Early symptoms, such as fever, vomiting, aches, muscle pain, cold hands and feet and headaches, can look similar to common illnesses like colds or flu. But someone with meningitis or septicaemia will usually become seriously ill in a matter of hours. That's why it's crucial to keep checking on anyone who is unwell.

MENINGITIS SYMPTOMS?

- fever
- a very bad headache (this alone is not a reason to get medical help)
- vomiting
- stiff neck
- dislike of bright lights
- rash (DO NOT wait for a rash to appear before seeking medical advice)
- confusion, delirium
- severe sleepiness, losing consciousness
- fits

SEPTICAEMIA SYMPTOMS?

- fever and shivering
- severe pains and aches in limbs and joints
- vomiting
- very cold hands and feet
- pale or blotchy skin
- rapid breathing
- diarrhoea and stomach cramps
- red or purple 'bruised' or blotchy rash on skin that does not fade under pressure - do the glass test. On dark skin, check paler areas of the skin, such as the palms of the hands, soles of the feet, inside the mouth (roof), and the eyelids
- difficulty walking or standing
- severe sleepiness, losing consciousness

If you become worried about yourself, your child, or a friend, particularly if symptoms are getting worse, seek medical help urgently.

EARLY TREATMENT CAN BE LIFE-SAVING.
